

Dear Human Resource Manager,

I am writing to express my interest in the Front-End Developer position at your organization. I am currently pursuing a Bachelor of Arts (Hons) from the University of Delhi and have developed strong skills in building responsive and user-friendly web applications using modern technologies such as React.js and JavaScript.

Through my academic journey and hands-on projects, I have gained practical experience in front-end development. I have built several projects including an e-commerce website with shopping cart functionality, a dynamic news application using React.js and API integration, and a responsive restaurant website. These experiences have strengthened my understanding of UI/UX principles, responsive design, and component-based architecture.

I am proficient in HTML5, CSS3, Bootstrap, JavaScript (ES6), and TypeScript, along with libraries such as React.js and jQuery. I am particularly passionate about creating clean, efficient, and visually appealing user interfaces that enhance user experience.

In addition to my technical skills, I bring strong teamwork, adaptability, and communication abilities. I am eager to learn, grow, and contribute to innovative projects in a collaborative environment.

I would welcome the opportunity to discuss how my skills and enthusiasm align with your team's goals. Thank you for considering my application.

Sincerely,

Rahul Bisht
